diffuse light

Dynamic LED diffused light table lamp. Dimmable. Painted aluminium base, borosilicate glass structure, Lycra® top membrane. The lamp comes with 3 borosilicate glass spheres of different weights.

The number and weight of the spheres that are placed on the fabric change the intensity and hue of the light emitted by exploiting an LED source with dynamic white: with light weights it is more delicate and warm, adding spheres the light becomes stronger and colder.

The ball bearing base is made from **PaperStone®** material, which is FSC® certified, formaldehyde-free and VOC-free. **Made from 100% recycled paper and PetroFree™ plant-based resins.** Natural pigments are used instead of chemical dyes to ensure greater UV resistance and colour stability.

As strong as steel, as beautiful as stone.

Each slab is unique.
